

Compliance Assistance for Auto Recyclers

Description

This session will focus on issues related to compliance at auto recycling facilities. It will include an overview of assistance tools and pollution prevention tips being developed for auto recyclers by NYSDEC and Ohio EPA. In addition the session will include a summary of environmental assistance activities by a National Auto Recycling Workgroup chaired by OECA, EPA.

This sector has been unusually difficult to address and only recently have states recognized the need to develop multimedia pollution prevention programs that help to improve environmental regulatory compliance at these complicated facilities.

Goals/Outcomes

To share information on various strategies developed for the auto recycling sector by state and EPA environmental compliance assistance programs.

Key Questions

- ☐ What are the components of a successful auto recycler compliance assistance program to be carried out by environmental regulatory agencies?
- ☐ What tools are available for providing an effective compliance assistance program for the auto recycling sector?

How can assistance providers develop a database of all facilities (registered and non-registered) with appropriate parameters for monitoring effectiveness of compliance assistance activities and improvements in regulatory compliance?

Presenters

Mary B. Werner, Director, Pollution Prevention Unit, New York State Department of Environmental Conservation (mhwerner@gw.dec.state.ny.us)

Laurie Stevenson, Manager, Small Business Assistance Office, Ohio Environmental Protection Agency (laurie.stevenson@epa.state.oh.us)
